Gustavo Andrés Marin

SENIOR WEB DEVELOPER

PERSONAL DETAILS

Nationality:	Italian / Argentinian
City:	Madrid, Spain
Phone:	(+34) 658 817 219
Email:	gustavoandresmarin@gmail.com

PROFESIONAL PROFILE

I am a developer with over 10 years of experience in web application development. I've been working throughout those years with technologies like PHP, MySQL, Oracle, Javascript; and with lots of libraries and frameworks like jQuery, Backbone, ExtJS, Zend Framework.

I studied computer science at Universidad Tecnologica de Rosario, despite I did not get graduated, that provides me a solid theorical background which suits perfectly with my working experience. I am a passionate and enthusiastic developer with significant proficiency in PHP, MySQL and Javascript, quite active and self-taught.

I am currently focused on improving my server side javascript and NoSQL skills.

TECHNICAL SKILLS

BACKEND

PHP & MySQL	Expert
JSON, XML, REST	Expert

HTML5 APIs	Moderate
Backbone, ExtJS	Moderate
CSS3, AngularJS	Basic

EDITORS & IDES			**OTHER TOOLS**	
Vim	Expert		Linux & Bash scripts	Expert
Eclipse, Netbeans	Moderate		Git, GitHub, SVN	Moderate
SublimeText, WebStorm	Basic		Amazon AWS	Basic

WORK EXPERIENCE

Analyst & Developer

PRISA DIGITAL

<div align="right">Mar 2007 - PRESENT</div>

Spain's leading company in production of digital news and information. One of my firsts task here was to improve the backend made with PHP and ExtJS. Also have helped design and develop new funcionalities to the company's propietary framework, both Javascript and PHP parts.

In 2009 I've worked as **Project Manager** in the complete redesing and refactoring of **cuatro.com**, leading, deciding and coordinating efforts of a group of ten developers.

In 2010 worked in design and development of the **VOD platform**'s security layer used by the previous **Canal+** video on demand feeds.

In 2012 was assigned to the **Push Notification project**. A cloud system to create, manage and deliver messages to several of the company apps. Involving innovatives technologies as **Amazon WS, RabbitMQ and cloud cluster management**.

Since the beginning of 2013 I'm involved in the development of YOMVI Web, **Live Streaming and VOD platform of Canal+**.

- **keywords**: javascript, jquery, ajax, xml, mysql, php, pear, zend
- **Sites**: yomvi.es, cuatro.com, elpais.com

Analyst & Developer

FIAT AUTO ESPAÑA

<div align="right">May 2002 - Jul 2006</div>

International automotive group. In this company I was involved in FIAT's Link intranet on all phases of development from analysis through design, coding, testing, and implementation. This intranet application consisted of showroom sale, logistics control, stock control, sales & productivity reports and CRM. This was used by the dealer network in Spain. I worked on the early stages of a later migration to the rest of Europe market.

Also worked in design and development stages of aftersale and workshops application to control and benchmark car reparation processes. And developed several automated webservices to update the website with car and accessories data on the internet.

- **keywords**: php, oracle, pl/sql, xml, soap, javascript, xhtml, ajax
- **Sites**: fiat.es

Senior Developer

Claxson Interactive

Multimedia company, entertainment content provider worldwide. In this company I worked as senior PHP developer. Involved in code migration from ASP to PHP and from MySQL to Oracle and PL/SQL. Also been involved in development of backend for content administration and a multilangual/multiplatform forum application.

- **keywords**: php, mysql, oracle, pl/sql, zope, xml, javascript
